

YOUR PREMIUM PARTNER FOR NEW AND USED PROCESSING
AND PACKAGING EQUIPMENT

GS 10-2 Belt Cutting Machine

Proven worldwide in thousands of applications, the GS 10-2 belt-cutting machine is a versatile solution for the pet food industry.

It efficiently, precisely, and gently processes a wide range of ingredients, including meats, vegetables, and other raw materials, ensuring high-quality results for pet food production.

Up to 1,500 kg/h Max. capacity

Your Benefits

- ✚ **Cost-effective** due to a reduced personnel requirement and an affordable purchase price.
- ✚ **High output** with precise and consistent cutting quality.
- ✚ **Easy operation and cleaning** – knives can be changed with no tools required.
- ✚ **Highly flexible** due to a large selection of cutting tools for different products and cutting types.
- ✚ **Compact design for a low space requirement** – for use as a stand-alone unit or integration into a processing line.
